Moving Together – for Better Health and Quality of Life.

It all started with a neck pillow ...

The anatomically shaped SISSEL neck pillow was originally created in 1986 and quickly attracted the interest of professionals in therapy, nursing, and rehabilitation. Clinical studies also showed the positive effect of the pillow. To this day, this anatomical, effective shape has stood the test of time and has since formed the basis of our corporate philosophy. The unique shape of the original neck pillow is still reflected in the SISSEL logo today.

'The natural way' – our guiding principle and commitment to supporting our customers' health in a natural way, with a high-quality product portfolio designed to help maintain and promote well-being. Under the visionary leadership of Managing Directors Jens and Lars Friebel, the SISSEL portfolio has evolved into a diverse, health-focused range of products, reflected in the different product worlds of our SISSEL Healthcare Circle.

Jens and Lars Friebel shape the dynamic and forward-looking leadership of SISSEL GmbH.

Our customers

Healthcare professionals around the world trust and rely on our products. Physiotherapists, doctors, trainers, and coaches rely on the quality and performance of 'Made by SISSEL' in their daily work. That's why we offer tailored solutions for a wide range of applications.

SISSEL – proven quality since 1986

Convincing in every detail: for over 40 years, the SISSEL brand has stood for quality and customer satisfaction. Every product in our health range is carefully selected and manufactured to the highest quality standards.

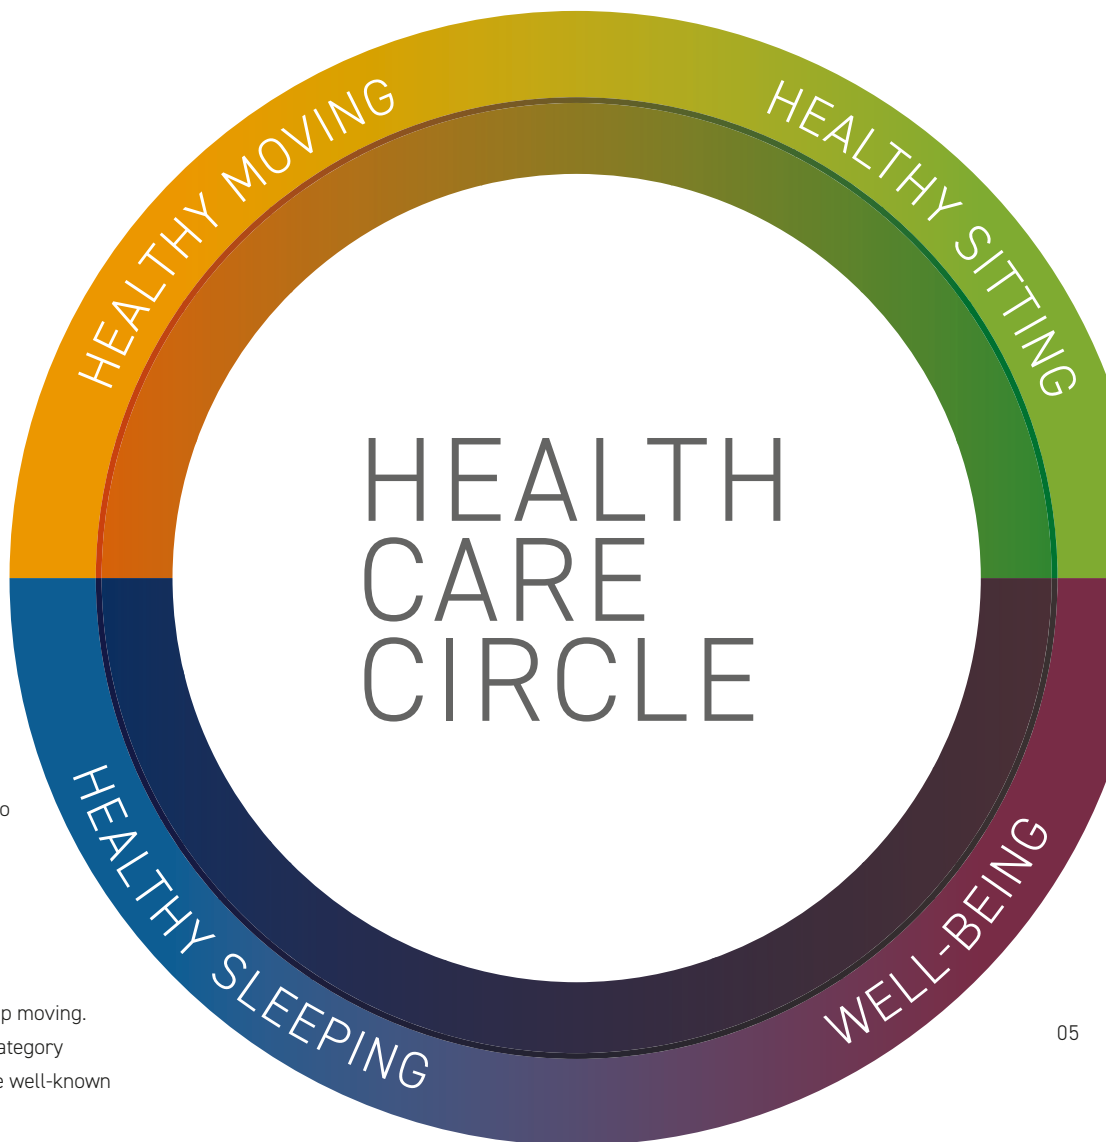

Continuous innovation in product development, production processes and technologies, material selection, and our strong focus on sustainability and social responsibility form the foundation of our company.

- Production primarily in Europe
- Quality management system certified according to DIN EN ISO 13485:2021

5-year SISSEL guarantee

You can rely on SISSEL quality. That's why we offer a 5-year guarantee on the shape retention of all SISSEL orthopaedic neck pillows, as well as the SISSEL Soft Curve, SISSEL Buchi Soft, SISSEL Medi Support, SISSEL Sit Special 2 in 1, SISSEL Sit Ring, and SISSEL Back.

The SISSEL Healthcare Circle

The SISSEL Healthcare Circle represents our entire product portfolio and organises it into four key product areas, supporting a holistic approach to our health-focused range.

Healthy Moving

If you want to stay fit, you need to keep moving. Our products in the Healthy Moving category support an active lifestyle – led by the well-known SPINEFITTER by SISSEL.

Healthy Sitting

Nowadays, we spend much of our day sitting – often leading to a range of issues and discomfort. Our Healthy Sitting products provide effective support for better posture – including the SISSEL SITFIT.

Well-Being

Whether it's heat, cold, massage, or simply relaxation – here you'll find products designed to support your personal well-being.

Healthy Sleeping

Healthy sleep is the foundation of well-being in everyday life. We offer a wide range of products designed to support restful sleep – including our original neck pillow.

Many of our innovations have become classics over time. Products such as the SPINEFITTER by SISSEL are making a strong impact in the health and fitness industry worldwide. Thanks to our international partners, SISSEL products are now available in over 70 countries.

At SISSEL, we place great importance on sustainability

A key milestone in conserving resources is our new product packaging. The new design stands out for its clarity, Scandinavian character, and focus on what matters most.

- Climate-neutral natural cardboard (CO₂-neutral)
- Reduced use of colour (single-colour printing)
- Packaging from responsible sources (FSC-certified)
- No outer packaging required (suitable for direct shipping)
- Stylised usage illustration on the front

SISSEL ACADEMY

Education & Inspiration

The SISSEL ACADEMY was founded a decade ago and stands for first-class international fitness and rehabilitation educational programmes led by a global community of experienced Educators.

As Head of SISSEL ACADEMY, Nina Metternich devotes her time to establishing and developing the academy on an international level. Thanks to her many years of experience in therapy practice and further training, Nina Metternich can draw on in-depth knowledge from the fields of physiotherapy, osteopathy, and Pilates. This enables her to ensure that the trainers are educated at the highest level.

The ACADEMY's mission is to support the high-quality training of future Educators and to create exciting and purposeful new workshops for the fitness and health industry of tomorrow. The SISSEL ACADEMY offers high quality workshops in a stimulating and professional environment. The SISSEL ACADEMY workshops permit attendees to dive deeper into the anatomical correlations and core principles of the selected SISSEL product and includes exercise programmes to support individual and group training and rehabilitation. The courses contain a strong focus on practice-based knowledge, thus allowing specialists to directly implement their newly gained knowledge from the workshop in their personal training or therapy practice.

Each workshop includes a detailed workbook that can be used as a manual for professionals in their daily work. After successfully completing the workshop professionals will receive a SISSEL ACADEMY Certificate.

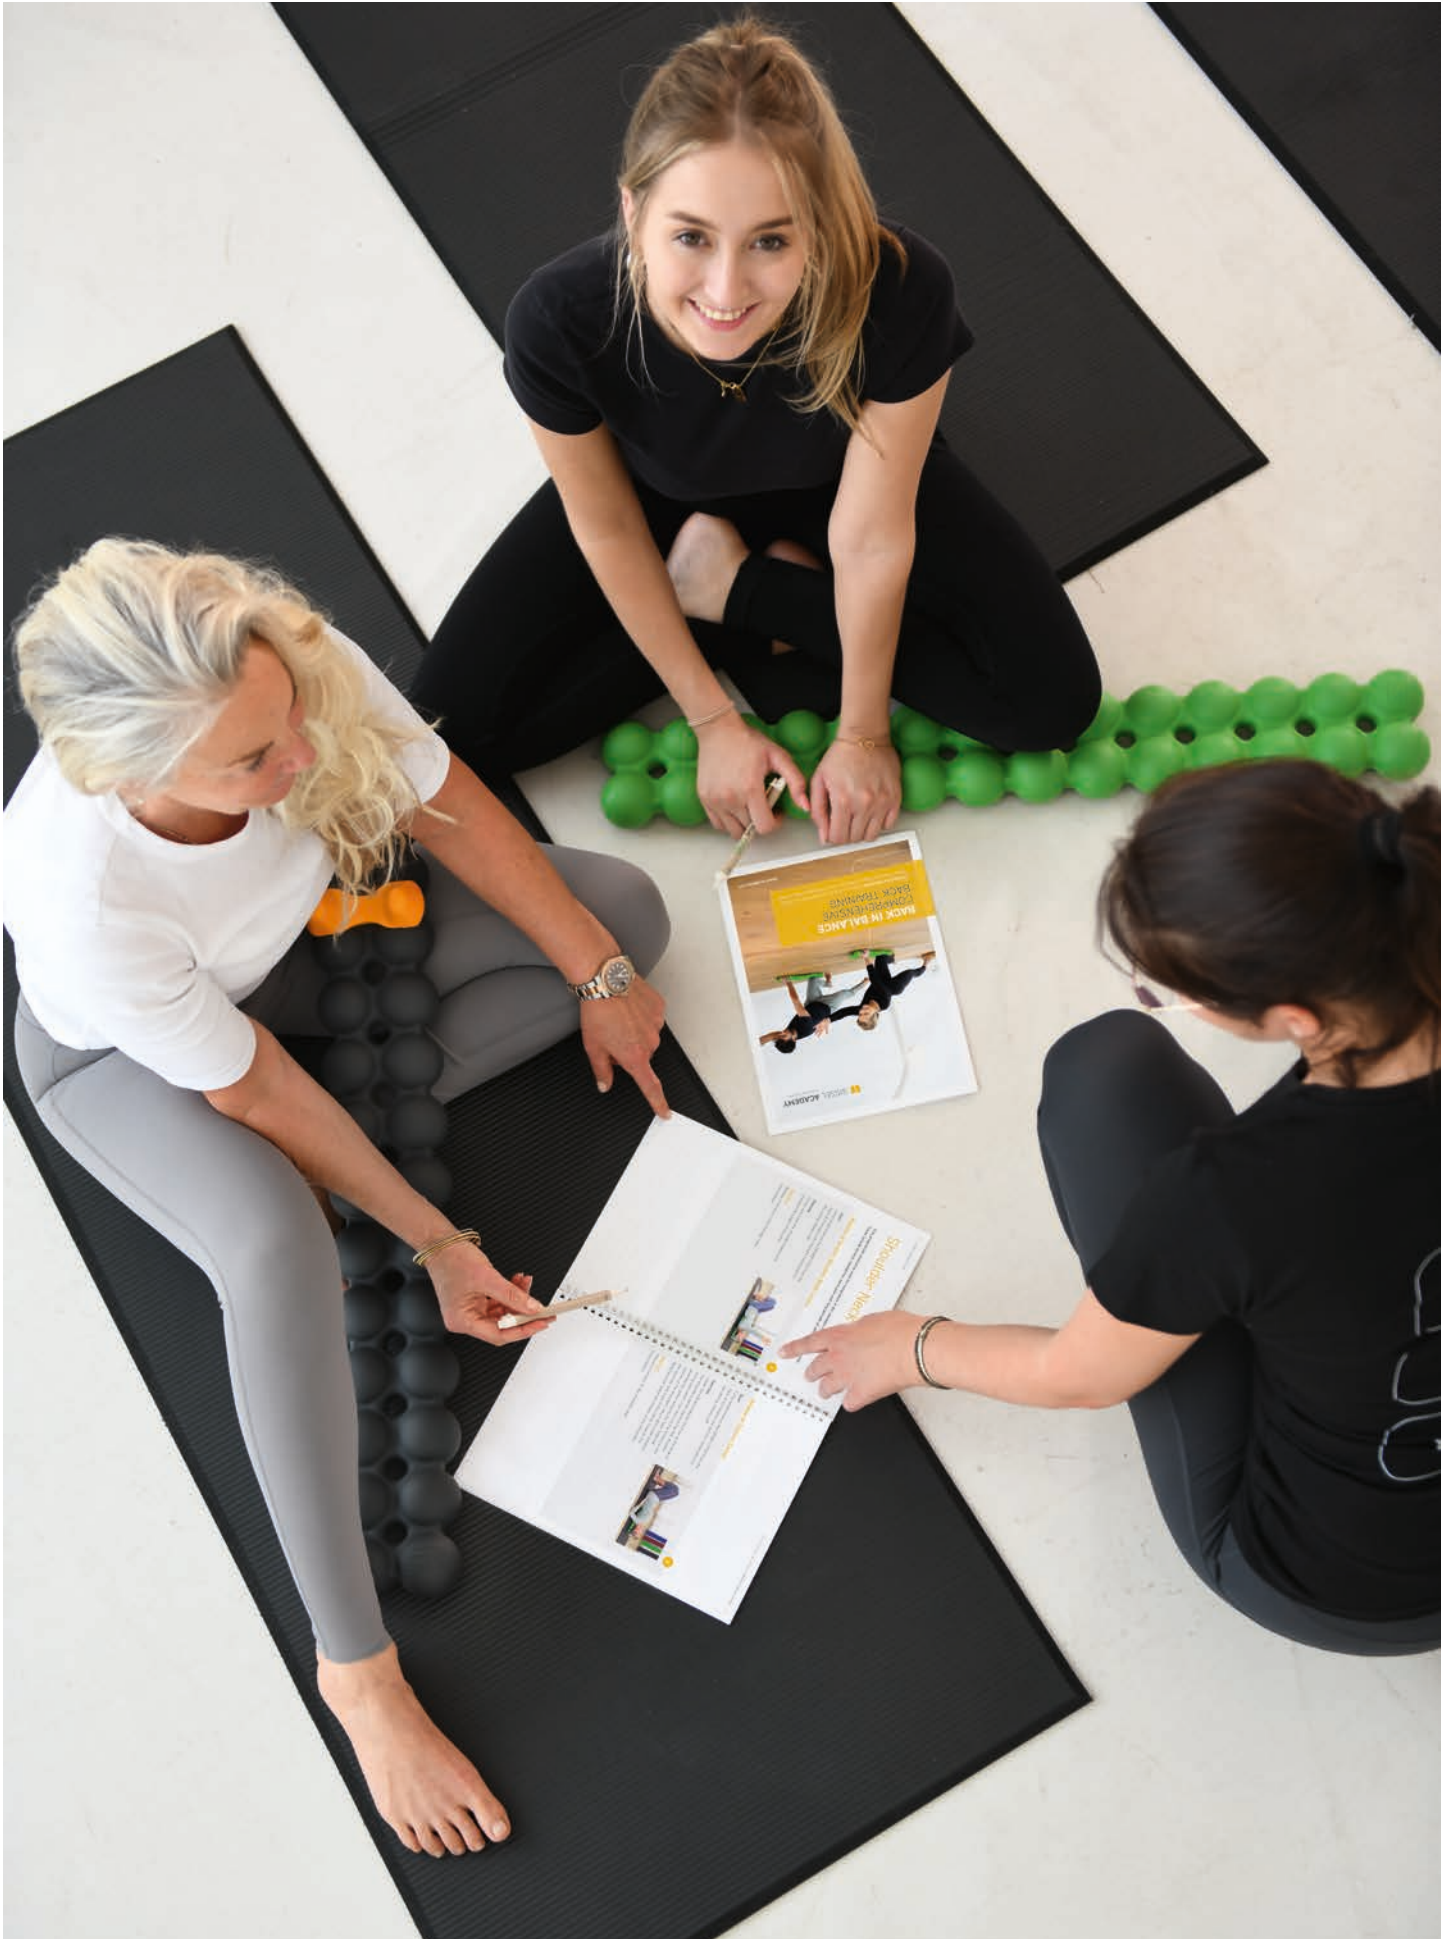

Deepen your skill set and get inspired by our dedicated workshop formats centred around the SPINEFITTER by SISSEL and brand new SISSEL product developments. Become part of our growing community of highly educated trainers and specialists.

We look forward to welcoming you to the SISSEL ACADEMY.

Our Workshops

Professional workshop: Back in Balance

Comprehensive back training – exercises with the SPINEFITTER by SISSEL

This 4-hour workshop, leading to certification as a 'Certified Professional Instructor', is specifically designed for physiotherapists, medical professionals, and trainers.

In this workshop, you will learn exercises for specific indications, understand their functional context, and work with structured exercise programmes. The workshop also covers anatomical principles, pathologies, therapeutic approaches, and practical guidance for working with your patients or participants.

08

Professional workshop: Functional training of the myofascial chains

Exercises with the SISSEL OCTOCORE

This 6-hour workshop, leading to certification as a 'Certified Professional Instructor', is specifically designed for physiotherapists, medical professionals, and trainers, and focuses on training functional muscle chains and engaging myofascial pathways.

In this workshop, you will work on training functional muscle chains and engaging myofascial pathways. A wide range of exercise variations enables you to address the entire body with each movement and effectively compensate for imbalances. The concept promotes functional training that provides new stimuli for your participants.

SISSEL ACADEMY

Education & Inspiration

09

Video course: SISSEL EPIFLOW

Learn about the versatile applications of EPIFLOW Tape in this practice-oriented course developed by experienced therapists. The innovative technique has proven to be particularly effective in the treatment of scar tissue, lymphatic congestion, and the mechanical relief of specific areas of the body.

In this video course, you will learn how the targeted application of EPIFLOW Tape can help activate the body's self-healing processes and relieve pain. You will not only gain an understanding of various pathologies and their underlying causes, but also explore individual treatment approaches.

You will receive valuable insights into the handling and application of taping techniques and will be able to apply them directly in your therapeutic practice. This 60-minute video course offers you the opportunity to expand your knowledge and further develop your practical skills in the field of modern therapy approaches.

New workshop formats are continuously developed based on current medical research and practical experience.

Healthy Moving

Find everything you need for your equipment setup – whether for the gym, at home, or in a physiotherapy practice. Whether you're looking for a new fitness tool to bring fresh momentum to your training or high-quality products from the fields of yoga, balance, fitness, fascia training, or Pilates, you'll find a wide selection of innovative and proven products.

SPINEFITTER® by SISSEL® System

Effectively helps relieve pain in the back, neck, and shoulder region

As part of an internationally conducted study, it was examined to what extent a specially developed SPINEFITTER training programme improves the mobility of the thoracic spine, cervical spine, and shoulder joints, and contributes to the reduction of tension and pain in the neck and shoulder area. The results of the study show clear improvements in all areas analysed.

or online at spinefitter.com

An Innovation by SISSEL®

An innovative, modular system for maximum application possibilities

Versatile and impactful training

The SPINEFITTER System was developed by an interdisciplinary team of physiotherapists, osteopaths, and Pilates trainers. Numerous exercises from the fields of Pilates and Yoga can be combined and supplemented with the SPINEFITTER. The SPINEFITTER loosens muscular tension, mobilises joints, and strengthens deep muscles. Thanks to targeted exercises, the SPINEFITTER helps to relieve pain effectively in the back, neck, and shoulder areas*.

The SPINEFITTER is made of PU integral foam and thanks to its unique shape, consisting of a 28 double-row ball structure, the SPINEFITTER enables comprehensive back training. The modular design of the system makes it easy to attach various add-ons and thanks to its excellent connection options, this effective training tool becomes a valuable treatment and relaxation aid. Versatile exercise options allow to train safely and effectively in the physiotherapy practice, studio, and at home.

Discover the SPINEFITTER System and learn why this multi-tool has quickly become a professional asset in the physiotherapy practices and self-treatment at home.

*Scan the QR code on the left to view a summary of the study.

SPINEFITTER by SISSEL Trigger Tool

The attachable module offers a simple way to autonomically release trigger points and hardenings along the spine most precisely, and, thus, contributing to pain relief.

Tip: Can also be combined with the SPINEFITTER Mini.

SPINEFITTER by SISSEL Multi Extension Kit

Expands the range of exercises and is perfect for people taller than 180 cm. Consists of the SPINEFITTER by SISSEL Mini and a Connector. The simple click system ensures a correct alignment of the Multi Extension Kit.

SPINEFITTER by SISSEL
Multi Extension Kit:

OCS
SPINEFITTER
BACK IN BALANCE

SPINEFITTER – One Tool,

SPINEFITTER in therapy

Using the SPINEFITTER in your therapy opens up entirely new possibilities for the effective mobilisation of the spine and targeted treatment of the muscles around the shoulder joint.

Your patients will feel the difference immediately, enhancing body awareness and making newly gained mobility both visible and tangible. They quickly understand which muscles are activated to support spinal stability when working with the SPINEFITTER.

The SPINEFITTER can be used flexibly on a treatment table or on a mat, allowing it to be easily integrated into a wide range of therapeutic concepts.

In our SISEL ACADEMY workshops and webinars, experienced educators demonstrate the wide range of applications of the SPINEFITTER in therapeutic practice.

SPINEFITTER in group training

The SPINEFITTER is the ideal partner for your group training sessions. Users immediately feel its positive effect on the body. Through the direct feedback provided by the SPINEFITTER, individual corrections by the trainer are not required. Participants quickly recognise which muscles need to be activated and learn to perform movements more consciously.

The result: effective and noticeable mobilisation, as well as targeted release of tension within a group setting – all without the need for constant instruction. This makes the SPINEFITTER an ideal tool for efficient, safe, and modern group training.

Many Possibilities

SPINEFITTER in sport

Whether for warm-up, training, or rehabilitation, the SPINEFITTER is an ideal training tool for both amateur and professional athletes to release tension in a targeted way and prepare the body for physical demands. Its flexibility and the variety of exercises make it suitable for the requirements of a wide range of sports.

The SPINEFITTER has both a mobilising and activating effect. During the recovery phase, it supports tissue relaxation and helps relieve stressed muscles. This makes the SPINEFITTER an effective tool for enhancing performance, helping to prevent injuries, and supporting recovery as part of everyday training.

SPINEFITTER at home

Quick and easy back training with the SPINEFITTER – all from the comfort of your own home. Effectively address pain and discomfort in the back, neck, and shoulders while simultaneously mobilising your spine and strengthening your supporting musculature. The SPINEFITTER is your ideal training companion for everyday use.

A wide range of simple and effective exercises, available in video format, allows for individual and targeted training of the shoulders, neck, and back. Just a few minutes are enough to make a difference.

15

Free training videos

Easy-to-follow exercises and training programmes in video format help you perform all movements correctly. This makes the SPINEFITTER a reliable companion for health and well-being, supporting everyday use, prevention, treatment, and training – whether in therapy, during sport, or at home.

In twelve free online training videos, you will discover a wide range of exercises with the SPINEFITTER.

SPINEFITTER® by SISSEL®

The innovation for a healthy back

Thanks to its unique design the SPINEFITTER by SISSEL enables comprehensive back training. The paired ball structure enables the spinous processes to sink in, which, even in a simple supine position, achieves a positive effect on the muscular tissue adjacent to the spinal column. The small vertebral joints can be opened and, thus, one's mobility can be improved. The SPINEFITTER is an intuitive training device and can be used for exercises in the area of spinal gymnastics, Pilates, and Yoga. Intuitive handling and a quickly noticeable effect make the SPINEFITTER an ideal piece of equipment for regular training in the Pilates or fitness studio, in therapy, or at home.

- Innovative training device with 28 interconnected balls
- Intense, deep-impact pressure across the entire muscular and fascial tissue along the spine
- Improves joint mobility, supports a more upright posture, and increases athletic performance
- Ideal for proprioceptive and balance training
- Strengthens deep muscular tissue
- Available in four colours: anthracite, green, blue, purple red
- Incl. SPINEFITTER Carry Strap for comfortable transport on the back

SPINEFITTER

BACK IN BALANCE
PINK HERO EDITION 

SPINEFITTER[®] by SISSEL[®] Pink Hero Edition

Supports rehabilitation following breast cancer surgery

Many breast cancer patients particularly appreciate working with the SPINEFITTER to address treatment-related limitations such as reduced mobility. This positive feedback inspired us to launch a limited edition of 10,008 SPINEFITTER PINK HERO EDITION units. Part of the proceeds from this Special Edition will be donated to charitable organisations that support breast cancer patients.

This training device, identical in shape and function to the original, is presented in a distinctive pink colour. Pink is internationally recognised as a symbol of solidarity in the fight against breast cancer – particularly through the Pink Ribbon campaign and 'Pinktober' (Breast Cancer Awareness Month in October). The aim is to raise public awareness of the condition, while supporting research and providing assistance to those affected.

Relieves symptoms:

- Restores shoulder mobility
- Stretches the anterior muscle chain
- Stimulates lymphatic flow, which is important for the healing process
- May contribute to pain relief
- Enhances body awareness
- May support mental health

Included: The SPINEFITTER Sleeve

Breast cancer patients who have recently undergone treatment are often more sensitive to touch and pressure. The soft terry cloth cover helps to reduce pressure during use of the SPINEFITTER.

SPINEFITTER[®] by SISSEL[®]

Trigger Tool

For the targeted relaxation of trigger points

It allows targeted, punctual pressure to be applied to trigger points, hardenings, and tensions. Consequently, the module offers a simple way to autonomously release trigger points and hardenings along the spine most precisely and, thus, contribute to pain relief. The shape of the Trigger Tool ensures symmetrical, constant pressure with the surface area of a therapeutic thumb. This allows pain points to be specifically released, blood circulation to be increased and the muscles to work evenly again.

- Pain reduction of trigger points
- Shape ensures a symmetrical, constant pressure
- Individual placement
- Optimum degree of hardness*
- Vary and regulate the intensity of the pressure using your own body weight

Thanks to the simple click system, the SPINEFITTER by SISSEL Trigger Tool can be effortlessly connected to the SPINEFITTER and SPINEFITTER Mini.

Item	Description

* The shape and hardness of the Trigger Tool have been designed in such a way that the trigger points are targeted effectively yet as gently as possible.

SPINEFITTER® by SISSEL®

Linum & Linum Pro

For the relaxation of the paravertebral muscles

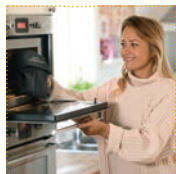

The custom-fit SPINEFITTER cover with natural linseed filling can be used for heat application on the SPINEFITTER. The Linum/Linum Pro provides natural warmth along the entire spine and is ideal for relaxation, for loosening up the muscles before or after training, or for relieving pressure on the paravertebral muscles when training with the SPINEFITTER. Using the Linum/Linum Pro increases blood circulation along the spine and thus relieves pain.

- For heat application
- Ideal for relaxation or loosening up the muscles
- Filling: natural linseed filling
- Can be combined with the SPINEFITTER by SISSEL and Extension Kit

SPINEFITTER by SISSEL Linum Pro

- Specially developed for use in physiotherapy practices, Pilates and fitness studios – thanks to the wipeable and disinfectable surface

The hook-and-loop fasteners enable the simple insertion of the SPINEFITTER by SISSEL and the optional Extension Kit.

SPINEFITTER® by SISSEL® Multi Extension Kit

For greater exercise variety and targeted self-treatment

Expand the SPINEFITTER by SISSEL with two additional pairs of balls and the specially designed connector to achieve greater exercise variety. Introduce new training stimuli with the Multi Extension Kit and support specific areas of the body to optimise self-treatment in a more targeted way.

- Extends the regular SPINEFITTER by SISSEL by 12 cm (2 pairs of balls)
- Contains: 1 x SPINEFITTER by SISSEL Mini and 1 x Connector
- Expands the range of exercises
- Perfect for people taller than 180 cm
- Simple click system ensures correct alignment of the Extension Kit
- Enables precise self-treatment of certain parts of the body

SPINEFITTER by SISSEL Mini (without Connector)

- Extra small and light – perfect for traveling, in the office, or on the go
- Supports segmental spine mobilisation exercises
- Perfect for fascia release of individual areas
- Suitable for balance exercises and for strengthening of deep muscle structures
- Also available individually, without connector, incl. SPINEFITTER carrying strap
- Can be combined with the SPINEFITTER by SISSEL Trigger Tool

Item	Description

SPINEFITTER® by SISSEL®

Accessories

SPINEFITTER® by SISSEL® Backpack

- The backpack for transporting one SPINEFITTER incl. mounted SPINEFITTER Linum/Linum Pro
- Backpack made of 100% cotton
- Colour: anthrazit

SPINEFITTER® by SISSEL® Drinking Bottle

An ideal training companion – this stainless steel drinking bottle keeps beverages at the desired temperature for an extended period of time.

- Double-walled, vacuum-insulated stainless steel bottle, food-safe
- Dishwasher safe
- Capacity: 500 ml
- Laser-engraved SPINEFITTER logo
- Material: stainless steel, silicone, PP
- Dimensions: approx. 23 x 6.7 cm

SPINEFITTER® by SISSEL® Coach Bag

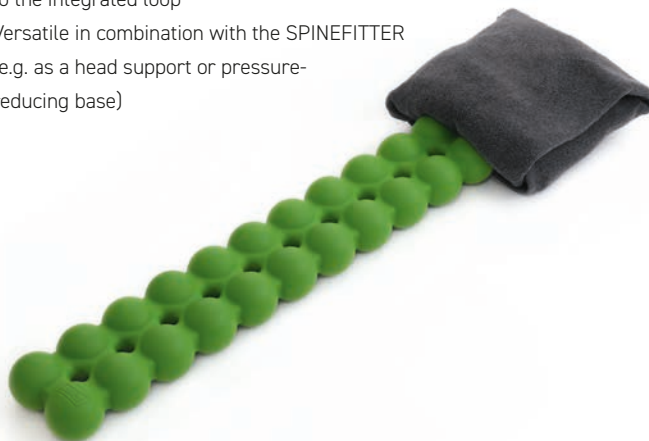

- Matching carrying bag for 10 SPINEFITTER
- Enables easy transport of the SPINEFITTER for group training
- Dimensions: approx. 95 x 44 x 30 cm (when filled)
- Also available as a set incl. 10 SPINEFITTER (see page 16)
- Coach Bag made of 100% cotton

SPINEFITTER® by SISSEL® Towel

SPINEFITTER Towel reduces the pressure from SPINEFITTER on the musculature along the spine, allowing for more comfortable training.

- Material: 100% cotton
- Practical training companion for the gym – easily secured to a training bench thanks to the integrated loop
- Versatile in combination with the SPINEFITTER (e.g. as a head support or pressure-reducing base)

Junior

NEW

YouTube

The training companion for children and adolescents

The SPINEFITTER Junior is aimed directly at the individual physiological needs of children (from the age of 4) and adolescents (up to approx. 60 kg). The innovative training tool for use in therapy and sport was developed together with physiotherapists and addresses typical challenges such as poor posture, motor development disorders and sensory integration problems. The SPINEFITTER Junior provides targeted support for improving core strength and can have a lasting positive effect on posture and body awareness. The child-friendly design and carefully selected, soft and tear-resistant material make the SPINEFITTER Junior a safe and durable training companion.

- Addresses the muscular, sensory and coordination challenges of children and young people
- The perfect companion to support and encourage children and young people in physiotherapy and sport
- Ideally suited for balance and coordination exercises or sensorimotor training
- Material testing in accordance with EN 71-3:2019+A1:2021 (Safety of toys – Part 3: Migration of certain elements)

The ideal ball size

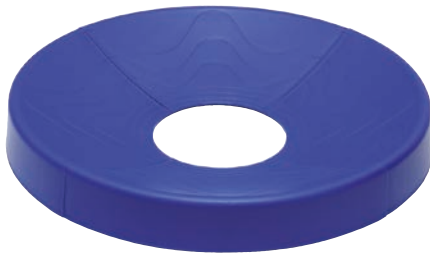

Measure the length of the arm from the shoulder to the hand. This measurement roughly corresponds to the required minimum diameter of the ball. Always choose the ball with the larger diameter.

Accessories for Gym Balls

SISSEL® Stabilizer

Holds the ball in place also when not used.
Made from high-quality polypropylene.

 YouTube

SISSEL® Stackers

Our 3-piece set of Stackers provides a space-saving storage of 3 balls at a time (for ball diameters of Ø approx. 65 cm and up).

SISSEL® Mini Hand Pump

The ultra strong Hand Pump – even works in case of strong counter pressure.

Item	Description
800216	SISSEL Stabilizer, Ø approx. 45 cm, quadripartite, blue
800218	Set of Stackers, acrylic, 3 pcs. – <i>as long as stock lasts</i>
800219	Hand Pump

SISSEL® EPIFLOW Kinesiology Tape

The taping innovation for skin and tissue activation

The easily shapeable activation flap of the EPIFLOW Tape allows for manual mobilisation of skin areas and deeperlying tissue. This expands its range of applications in scar treatment and local lymphatic drainage. The EPIFLOW Tape is also used in physiotherapy, rehabilitation, and (high-performance) sport to improve muscle function and support pain reduction.

- Innovative activation flap
- Gentle action on the deeper skin layers
- Promotes flexibility and blood circulation in the tissue
- Supportive aid to promote lymph flow in cases of primary or secondary lymphoedema
- May help to loosen and improve blood circulation in areas of scar tissue

Pilates Matwork

Enhance your Pilates training with premium equipment that improves the precision of your movements and visibly supports your progress.

Pilates – Body & Mind Training

The secret of the method lies in its holistic approach, with positive effects on both body and mind: Pilates tones the body and improves flexibility, strength, endurance, and inner balance.

Pilates matwork is the most widely recognised form of Pilates training. Joseph Pilates (1883–1967), the founder of the renowned Pilates method, developed numerous gentle yet highly effective exercises that can be performed on a mat.

Depending on the desired level of difficulty, small equipment such as balls or rollers can be used to vary the exercises. Pilates matwork can be practised easily at home. In addition, many fitness studios and physiotherapy practices have integrated this training method and offer Pilates matwork as personal training or in group classes.

'In 10 sessions you'll feel the difference, in 20 sessions you'll see a difference, and in 30 sessions you'll have a whole new body.'

Joseph Pilates

Healthy Sitting

Active, dynamic sitting relieves strain on the upper body and strengthens the back muscles. Find the right support for your daily sitting routine – whether in the office, in the car, or at home. For comfortable, upright, and healthy sitting wherever you are.

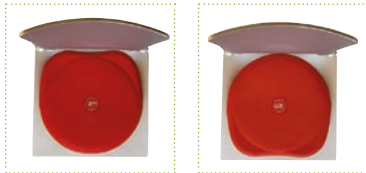

SISSEL® SITFIT Plus

YouTube

Active sitting with a 2-in-1 function

- Perfect combination of a wedge seat and an air-filled seat cushion
- Optimal balance of active sitting and seating comfort thanks to the anatomical shape
- The special shape allows the cushion to be rotated as needed. Sitting on the front thigh support is recommended for beginners
- Active and dynamic sitting relieves strain on the upper body and strengthens the back muscles without targeted training
- Helps to promote an upright posture
- Also suitable for training the back and pelvic floor muscles
- Includes pump for individual pressure adjustment
- Max. body weight: 138 kg

Round side in the front:

- active and dynamic sitting
- suitable for short sitting intervals and exercises

Thigh rest in the front:

- stabilized sitting due to thigh rest
- suitable for long sitting intervals

Well-Being

Heat therapy products help relieve rheumatic conditions, muscle tension, and back pain. Cold therapy supports the reduction of swelling, while our portable therapy devices can be used flexibly in different settings. Relax and recover with our well-being products.

Hot-Cold Therapy

Enjoy soothing warmth for the shoulders, back, abdomen, and joints – ideal for relaxation and well-being. Heat is often recommended for rheumatic conditions, muscle tightness, acute back pain, and menstrual discomfort. Cold therapy, on the other hand, helps reduce swelling and has a calming and relaxing effect.

SISSEL® Hot-Cold Pearl Masks & Packs

SISSEL® Vinotherm

YouTube

Natural heating pad – tri-sectional. For specific treatment of neck, shoulder, back and kidney region

- 100% grape seed filling – no further filling material added
- Pleasant scent when heated
- Tri-sectional shape for convenient usage and perfect fit
- Easy and fast heating in microwave or oven

Advantages of grape seed filling

Grape seeds are naturally fine and fit snugly and lightly to the body. They contain grape seed oil which stores heat for a long time and releases it as a dry warmth which penetrates deep into the body. Use: To relax tense muscles, warm up muscles before massage or for cold-related discomfort.

- Ideal for massage and relaxation
- Helps to loosen the muscles and support connective tissue massage
- Helps prevent muscle tension
- Improves blood circulation
- Suitable for massage of the back and leg muscles

Ideal for fascia release.
Find more fascia release
products on pages 46-49

Find more information on page 49.

Inversion for Back Problems

Full or partial inversion naturally stretches the back, allowing the spine and weight-bearing joints to relax and recover. The degree of stretch is determined by the body's own weight and is therefore automatically adjusted.

SISSEL® Hang Up

The inversion table for home and professional use

- Increasing stress on musculature, joints and the spinal column caused by physical activities, like sports, excessive workouts, bending, lifting, long sitting or standing lead to compression and rotation pressure and are often the reason for complaints
- The reversed strain during exercises with the inversion table automatically creates a relief
- Eases tensions, contributing to a sustainable pain relief
- Enhances blood circulation
- Can also be used for athletic workouts, such as sit-ups
- Fast set up, space-saving storage
- The compact inversion table
- Suitable for body heights of approx. 1.40 m up to 1.98 m
- Maximum height approx. 2.05 m to 2.09 m (with maximum body height adjustment)
- Max. body weight: approx. 110 kg

Item	Description
800544	SISSEL Hang Up, black - as long as stock lasts

Maximum height approx. 2.05 m to 2.09 m

black, silver

Healthy Sleeping

The unique shape of all SISSEL orthopaedic neck pillows ensures optimal shoulder positioning, even when lying on your side, helping to relieve pressure on the vertebrae and intervertebral discs. Form, quality, and design – proven for over 40 years.

SISSEL[®] Orthopaedic Neck Pillows

Form, quality, and design – proven for over 40 years!

The shape of all SISSEL orthopaedic neck pillows provides defined support in the lower cervical spine area. As a result, the entire shoulder and neck region is supported. Thanks to its unique contour, the pillow fits smoothly between the shoulder and the cervical spine, filling the space and guiding the spine gently into its anatomically correct position.

Due to a slight stretching effect on the neck and spine, the adjustment may initially feel unfamiliar. The body needs some time (2 to 14 nights) to adapt again to natural, healthy sleep and to lying on an anatomically shaped original SISSEL neck pillow.

In the supine position, the support gently gives way due to the available space, allowing the shoulders to relax and sink down. The chest opens, and the neck is lengthened.

Our neck pillows are made from polyurethane foam with excellent support capacity:

- SISSEL Orthopaedic Pillow Classic
- SISSEL Orthopaedic Pillow Classic Plus

Our neck pillows are made from viscoelastic foam, a soft and highly adaptive material:

- SISSEL Orthopaedic Pillow Soft
- SISSEL Orthopaedic Pillow Soft Plus
- SISSEL Orthopaedic Pillow Soft Deluxe
- SISSEL Orthopaedic Compact Pillow
- SISSEL Orthopaedic Pillow Soft Bambini

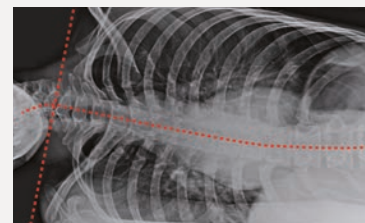

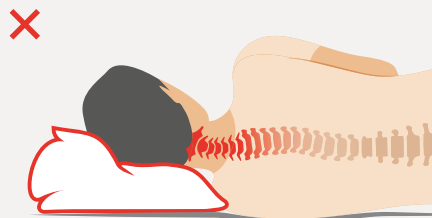

All pillows are hand-washable. For further details, please refer to the individual product descriptions.

YouTube

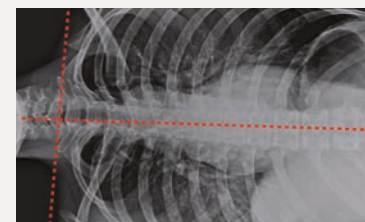

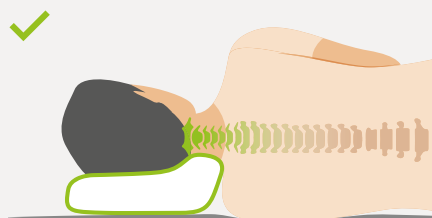

The unique contour of all SISSEL orthopaedic neck pillows ensures that the shoulder is positioned correctly, allowing the spine and intervertebral discs to be optimally supported.

A conventional pillow does not provide sufficient support for the neck and cervical vertebrae.

The SISSEL Orthopaedic Pillow provides perfect support for the neck, no matter how you lie.

101

Scientific background: neck problems and referred neck pain

Excerpt from a study¹ by Hugh Smythe, MD, University of Toronto

Pain originating in the neck is common but is often misdiagnosed, as symptoms may be perceived elsewhere. Shear and compressive forces in the lower cervical spine cause pain to be referred in such a way that the brain draws incorrect conclusions about the location of the injury.

Repeated strain, particularly during sleep, can delay recovery. Effective treatment requires reliable support of the lower cervical spine throughout the entire night – every night.

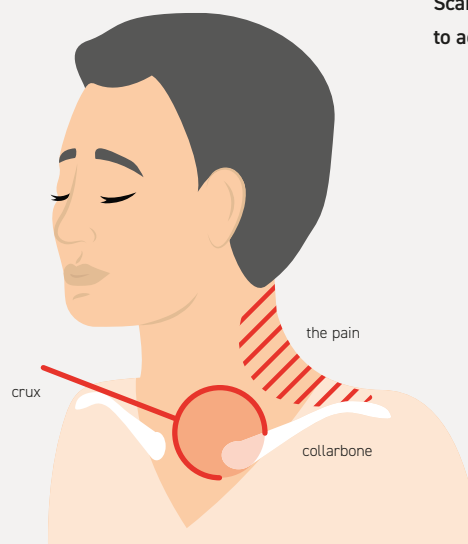

Healthy sleep is essential – it allows the body to recover from demanding days and promotes relaxation. If restorative sleep is not achieved, the consequences can be significant: tension headaches, inner restlessness, and reduced physical as well as mental performance.

Do not let it come to that. With a SISSEL Orthopaedic Pillow, you can enjoy restful and relaxed sleep again.

Actively Supportive Pillows

Orthopaedic neck pillows with actively supportive polyurethane foam

These pillows with active support are made from polyurethane foam, providing firm support and correct positioning in the neck and cervical spine area.

Recommended for:

- Neck and shoulder tension
- Tension headaches
- Helps prevent misalignment of the spine (in a side-lying position)

The metal ball illustrates: The supportive and stable polyurethane foam effectively cushions the ball.

SISSEL® Classic

Our standard orthopaedic neck pillow

- The proven SISSEL orthopaedic neck pillow, trusted millions of times
- Ideal for side and back sleepers
- Pillow core washable by hand
- Cover washable at 40 °C

For further information on the unique shape of this orthopaedic neck support pillow, see pages 100-101.

ecru

SISSEL® Classic Plus

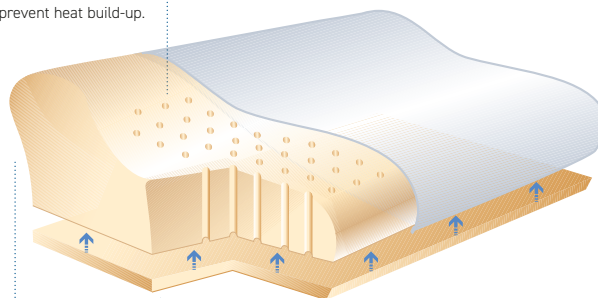

Height-adjustable orthopaedic neck pillow for different shoulder widths

- Height can be adjusted by inserting or removing the Vario Pad
- With a ventilation system for an optimal sleeping climate
- Ideal for side and back sleepers
- Thanks to its unique shape, this neck support pillow is particularly suitable for relieving pressure on the vertebrae and intervertebral discs of the cervical spine
- Pillow core washable by hand
- Cover washable at 40 °C

103

Ventilation system for an optimal sleeping climate. More than 90 ventilation channels help prevent heat build-up.

The unique contour of all SISSEL Orthopaedic Pillows ensures that the shoulder is optimally positioned even in a side-lying position, allowing the vertebrae and intervertebral discs to be relieved of pressure.

One pillow for everyone – adapts to shoulder width, neck length, and individual sleeping position thanks to the **Vario Pad**.

Pressure-relieving Pillows

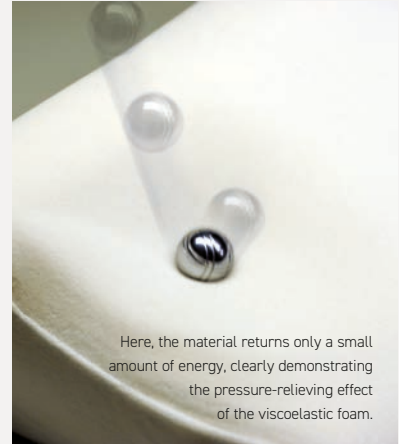

Orthopaedic neck pillows made from viscoelastic foam

These pillows are made from a pressure-relieving viscoelastic foam that absorbs pressure and redistributes it evenly within the pillow core. Models with the additional designation 'Soft' are recommended in cases of acute discomfort and pressure-sensitive muscles.

Recommended for:

- Acute discomfort in the neck and cervical spine muscles
- Pressure-sensitive muscles
- Provides targeted support in cases of neck and neck-shoulder discomfort

Here, the material returns only a small amount of energy, clearly demonstrating the pressure-relieving effect of the viscoelastic foam.

SISSEL® Soft

The softer neck pillow with gentle support

- Combines the benefits of the classic SISSEL orthopaedic pillow shape, proven millions of times, with the advantages of a viscoelastic foam filling
- The soft and highly adaptive material provides exceptional sleeping comfort, even for side and back sleepers with particularly sensitive necks
- The pillow adapts slowly and elastically to every shape
- No matter how the head and shoulders move during the night, the spine is always supported comfortably – softly yet stably
- Pillow core washable by hand
- Cover washable at 40 °C

Item	Description

SISSEL® Soft Bambini

The Bambini version of the proven SISSEL Soft orthopaedic pillow

Give your child a calmer and more restful night. Our SISSEL orthopaedic neck pillow is the ideal choice for deep and restorative sleep. This ergonomically and orthopaedically designed pillow provides the optimal support your child needs.

- Suitable for children aged 4 years and above
- Supports a correct neck position for side and back sleepers
- Pillow core washable by hand
- Cover washable at 40 °C

Item	Description
800018	SISSEL Soft Bambini, incl. cover

 approx. 37 x 25 x 9 cm

 Cover: 100% cotton
Filling: viscoelastic foam

Sleep Pillows

Gently supportive pillows made from viscoelastic foam

The ideal choice for people with pressure sensitivity: on these gently supportive pillows, the head and neck are quite literally free from pressure. They adapt perfectly and provide a soft yet stable surface with a slightly lower corrective intensity than SISSEL Orthopaedic Pillows.

SISSEL® Soft Curve

The gently supportive pillow for particularly sensitive necks

- Pleasantly soft while providing stable support
- Ideal for back sleepers
- Compared to the orthopaedic SISSEL shape, the Soft Curve sleep pillow is characterised by its flatter and more rounded form, offering a gentler yet stable support
- Supports the neck and helps relieve pressure on the vertebrae and muscles
- Adapts optimally to the natural shape of the cervical spine
- High-quality viscoelastic foam, moulded in a single piece
- Durable and shape-retaining
- Pillow core washable by hand
- Cover washable at 40 °C

Item	Description
800049	SISSEL Soft Curve, size S, incl. cover velours, ecru

Pillows with Natural Fillings

Experience healthy and comfortable sleep with our traditional pillows. Depending on your needs, we offer a range of different natural filling materials.

SISSEL® Palea

The breathable spelt husk pillow

- Adapts completely to the shape of the head and neck
- Helps maintain the natural alignment of the cervical spine
- Moisture- and heat-regulating
- Not washable

The benefits of spelt husk filling
Spelt husk is moisture-regulating and retains body heat, releasing it in a controlled and comfortable way. The pillow adapts to the shape of the head and neck, providing a pleasant yet stable form of support.

Item	Description
800040	SISSEL Palea, approx. 60 x 40 cm, without cover
800041	Cover SISSEL Palea, approx. 60 x 40 cm

approx. 60 x 40 cm

Cover: 100% cotton
Filling: 100% spelt filling

white

SISSEL® Panicore

The millet pillow – natural support for your cervical spine

- Adapts precisely to the shape of the head and neck, providing optimal support for the cervical spine
- Temperature-regulating and moisture-wicking
- Relaxing, with a gentle massaging effect
- Low-noise and low-dust
- Not washable

The benefits of millet husk filling
Millet husk is fine, soft, and pleasant to use, as it adapts to the shape of the body. Millet pillows are recommended for those who prefer to avoid the sound of rustling typical of spelt husk.

Item	Description
800046	SISSEL Panicore, approx. 60 x 40 cm, without cover

approx. 60 x 40 cm

Cover: 100% cotton
Filling: 100% millet

white

Travel Pillows

The perfect support on the go. With SISSEL travel pillows in a range of designs, the head and neck are always optimally supported – wherever you are travelling.

SISSEL® Buchi

The buckwheat-filled neck support

- Supports the neck during long and uncomfortable journeys by car, train, or aeroplane
- Ideal as a relaxing support when reading at home
- Adapts perfectly to the shape of the neck
- Cover washable at 40 °C

The benefits of buckwheat husk filling

Buckwheat husk is light, durable, and naturally cool – its key characteristics. The distinctly shaped hulls adapt to the body's contours, forming cushioned yet stable support for the head, neck, and shoulders.

Item	Description
800071	SISSEL Buchi, blue
