

# Granit

Treatment Tables

## (14.501.011) 3 Dimensional Table

**GRANIT** is a modern and functional 3 dimensional table. It may be used for kinesiotherapy, manual therapy and massage and other types of therapy (eg. Mc Kenzie). Its stable construction allows safe and precise therapy. This table has a possibility to vary the patient position in three space dimensions during treatment: lateral flexion, horizontal flexion/extension and rotation. That means that a therapist may comfortably, easily and precisely stabilize the patient in needed position. The height of the table plate is electrically adjusted through the motor with the use of remote control. Another advantage of this table is its modern design and simple use.

### TECHNICAL DATA

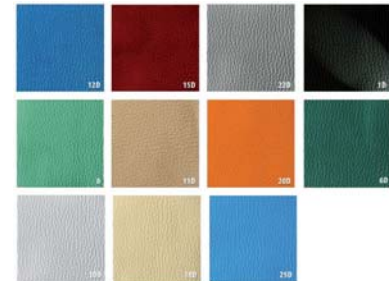

Dimensions: 2000mm x 660mm  
 Maximum weight of patient: 150kg  
 Weight of table: 80kg  
 Table height adjustment: 490 - 1020mm  
 Headrest angle-adjustment: from -35° up to 55°

3d Leg rest adjustment:  
 - frontal plane (flexion/extension) +70/-30°  
 - sagittal plane (side bend) +/- 15°  
 - transversal plane (rotation) +/- 10°

Headrest:  
 - 1 section with face hole  
 - 3 sections (2 armrests) - optional

### STANDARD AVAILABLE COLOURS

ecological leather

### OPTIONAL EQUIPMENT

- 3 sections headrest (armrest) [1] 14.501.013\*
- Central wheels system for mobility (with holders) [2] 14.501.016
- Paper roll holder [3] 14.501.018\*
- Fixing rods for stabilization belts [4] 14.501.017

### OPTIONAL COLOURS

natural leather

\* Attention: is not possible to equip Granit with 3 sections headrest and paper roll holder at once.
